DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-25 and 37-39, drawn to a gas sensor assembly, classified in class 73, subclass 23.200.
 - II. Claims 26-36, drawn to a method of manufacturing a gas sensor assembly, classified in class 29, subclass 592.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process can make a plurality of other sensors for performing different type of functions such as sensor for determining velocity, displacement or acceleration.
3. A telephone call was not made to applicant to request an oral election to the above restriction requirement.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim
